FRONT RANGE PASSENGER RAIL

PLANNING A NEW TRANSPORTATION OPTION FOR COLORADO'S FRONT RANGE

As communities grow, a new passenger train connecting Front Range Coloradans to jobs, housing options, opportunities, adventure and each other is on the horizon. Are you ready to leave long commutes and heavy traffic behind? We are too. We're planning for a future of safe, reliable and climate-conscious travel.

WHERE

Intercity passenger rail service will connect travelers across Colorado's Front Range with stations in Fort Collins, Loveland, Longmont, Boulder, Denver, South Metro, Castle Rock, Colorado Springs and Pueblo.

WHY

From 2020 to 2050, an additional 3 million people are expected to live and commute along Colorado's Front Range. Front Range Passenger Rail will provide a relaxed, efficient, and safe transportation option that provides increased accessibility to housing, workforce, employment opportunities and key destinations.

WHEN

Front Range Passenger Rail District (the District) is modeling service frequency, infrastructure, operation costs and financing needs. Daily passenger rail service is expected to launch within the decade.

HOW

The Colorado Legislature created the District to construct and operate a passenger rail system along the Front Range. Using existing tracks expedites the service start date. New passenger rail programs and expanded federal funding create a once-in-a-lifetime opportunity to bring passenger rail to Colorado's Front Range.

THE DISTRICT

The District extends from the Wyoming to New Mexico borders, spanning portions or the entirety of the 13 counties near Interstate 25 in Colorado. The nine stations will connect to other public transit services to provide an accessible transportation option.

BENEFITS OF PASSENGER RAIL

RELIABLE, ENJOYABLE TRAVEL

Unlike cars and buses that get delayed by roadway crashes, heavy traffic and weather, trains offer a more reliable and consistent travel experience. The time travelers will save by not sitting in traffic can be used to instead work, read, catch up with friends and family or just relax and enjoy the scenery.

CONNECTED COMMUNITIES

Front Range Passenger Rail will connect travelers to employment centers, housing options, colleges, universities, medical facilities and entertainment hubs along the Front Range corridor.

STRENGTHEN LOCAL ECONOMIES

Train service and stations are investments that pay dividends. As destinations, stations can enhance the vibrancy of downtowns, support local economies with increased revenue and job creation.

SUSTAINABLE GROWTH

Individual transportation is the largest contributor to air pollution in Colorado. As the state continues to grow, it is critical to invest in solutions that support a sustainable future. Passenger rail provides an alternative way to travel that helps take cars off the road, reduce emissions and supports our air quality goals.
